**1. NATURE OF OPERATIONS**

Rhyolite Resources Ltd. (the “Company”) was incorporated under the *Business Corporations Act* (Alberta) on April 6, 2006. Its principal business activities include the acquisition and exploration of mineral properties. The Company’s registered office address is Suite 1900, 520 – 3<sup>rd</sup> Avenue SW, Calgary, AB, and its principal place of business is Suite 1703, 595 Burrard Street, Vancouver, BC.

These unaudited condensed interim consolidated financial statements were authorized for issuance by the Audit Committee and Board of Directors on February 27, 2020.

**2. BASIS OF PRESENTATION****Statement of Compliance**

These unaudited condensed interim consolidated financial statements, including comparative periods, have been prepared in accordance with International Financial Reporting Standards (“IFRS”) and in accordance with International Accounting Standard (“IAS”) 34 “*Interim Financial Reporting*”, as issued by the International Accounting Standards Board (“IASB”), and interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”). These financial statements should be read in conjunction with the Company’s audited consolidated financial statements for the year ended June 30, 2019.

**Basis of Measurement**

These condensed interim consolidated financial statements have been prepared on a historical cost basis except for financial instruments classified as fair value through profit or loss, which are stated at their fair value. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

These condensed interim consolidated financial statements are presented in Canadian dollars, which is also the functional currency of the Company and its subsidiaries.

**Going Concern**

These condensed interim consolidated financial statements have been prepared on the assumption that the Company will realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. As such, these condensed interim consolidated financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations. While management believes that the Company has sufficient working capital to meet its projected financial obligations in the short-term, which includes the next fiscal year, its ability to operate as a going concern in the longer-term requires it enter into profitable operations or to raise additional financing.

**3. SIGNIFICANT ACCOUNTING POLICIES AND ESTIMATES**

With the exception of changes to accounting policies as a result of amendments to IFRS, these condensed interim consolidated financial statements have been prepared according to the same accounting policies and are subject to the same areas of judgement, measurement estimates and uncertainties as those disclosed in Note 3 of the Company’s audited financial statements for the year ended June 30, 2019.

**Recent changes to IFRS**

Effective July 1, 2019, the Company adopted IFRS 16 Leases which replaces the previous leases standard, IAS 17 Leases. IFRS 16 eliminates the classification of leases as either operating leases or finance leases as is required by IAS 17 and, instead, introduces a single lessee accounting model. The adoption of IFRS 16 did not result in any changes to the Company’s financial reporting including any restatement of amounts previously reported.

**4. EXPLORATION AND EVALUATION ASSETS - MINERAL PROPERTIES****Paxson Gold Property, Alaska, U.S.**

The Company acquired through an internal staking program certain mineral claims in the eastern Alaska Range, southwest of Tok, Alaska. As of December 31, 2019, the Company has incurred staking costs of \$44,615 (June 30, 2019 - \$44,615) in acquiring these claims. Exploration expenses on the Company's mineral properties are as follows:

	<b>Six Months Ended December 31, 2019</b>	Six Months Ended December 31, 2018

Management fees	3,486	727
Field expenses	538	1,028
	<b>\$ 12,518</b>	<b>\$ 8,785</b>

Title to mineral properties may be based on uncertain conveyance histories and therefore involves an inherent risk that title to the Company's mineral properties may be contested. The Company has investigated title to all of its mineral properties and, to the best of its knowledge, title to all of its properties is in good standing. Further, the Company has not been notified of any challenge to the validity of its claims.

**5. AMOUNTS RECEIVABLE**

The Company's amounts receivable arise primarily from the refund of sales taxes from Canadian taxation authorities.

**6. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES**

The fair values of amounts receivable and accounts payable and accrued liabilities approximate their carrying values due to their short-term maturity. Fair values of financial instruments are classified in a fair value hierarchy based on the inputs used to determine fair values. The levels of the fair value hierarchy are as follows:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

**9. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd...)**

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

*Credit risk*

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its cash and amounts receivable. The Company limits exposure to credit risk by maintaining its cash with large financial institutions. The Company does not have cash that is invested in asset backed commercial paper. The Company's amounts receivable consists of sales tax refundable from the Canada Revenue Agency and is not subject to significant credit risk.

*Liquidity risk*

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company ensures there is sufficient capital in order to meet short-term business requirements, after taking into account cash flows from operations and the Company's holdings of cash. The Company believes that these sources are sufficient to cover the likely short-term cash requirements, but that further funding may be required to meet long-term requirements. As at December 31, 2019, the Company had a cash balance of \$2,603,153 to settle current liabilities of \$7,865. All of the Company's financial liabilities have contractual maturities of 30 days or are due on demand and subject to normal trade terms.

*Market risk*

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

i. Interest rate risk

Interest rate risk arises from changes in market rates of interest that could adversely affect the Company. The Company currently has no interest-bearing financial instruments other than cash, so its exposure to interest rate risk is insignificant.

ii. Foreign currency risk

Foreign currency risk is the risk that is related to the fluctuation of foreign exchange rates. The Company has exploration and evaluation activities in Alaska, USA and costs related to this activity are typically incurred in US dollars while funds are typically raised by the parent company in Canadian dollars. The Company does not anticipate a large exploration program at this time and, as a result, is not exposed to significant foreign currency risk.

iii. Price risk

The Company holds no marketable securities or non-cash assets that are classified as financial instruments and, consequently, has no exposure to the price fluctuations of such instruments.

**10. CAPITAL MANAGEMENT**

The Company defines capital that it manages as its shareholders' equity. It manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The properties in which the Company currently has an interest are in the exploration stage; as such the Company is dependent upon external financings to fund activities. In order to carry out planned exploration and pay for administrative costs, the Company will spend its existing working capital and will attempt to raise additional funds as needed.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

The Company's capital management objectives, policies and processes have not changed in the six months ended December 31, 2019. The Company is not subject to any externally imposed capital requirements.
